

SYSTEMS REVIEW AND IMPLEMENTATION

Janaswamy Associates has professionals who are having extensive experience in assessing the effectiveness of systems. Our assessment examines your current use of technology and Applications and identifies areas where improvements would increase the effectiveness and efficiency of your operations. The goal is to help you maximize your technology investment.

Our approach to a technology assessment often includes the following elements:

- Identification of unmet management information technology needs
- Identification of current and future IT needs
- Pinpointing where bottlenecks occur and how technology contributes to these bottlenecks
- Evaluation of strengths and weaknesses
- Analysis and suggested solutions to issues identified during the assessment
- There are several benefits to a technology assessment, including:
 - Reduced operating costs
 - Minimized risk of costly technology decisions
 - Enhanced competitive position through the optimal use of technology
 - Confidence that your technology investments will support future needs
 - Improved use of current technology

More secure operations
